

**HOME  
SECURITY  
INSPECTION  
CHECKLIST**

An important step in preventing home burglary and other crimes is to make sure that a residence is as secure as possible. A careful inspection by someone trained to observe security precautions can indicate features which would make entry easy — or difficult — for a prospective burglar.

Chances are good that home security can be improved. Take a hard look at entry points in your residence and determine what steps can reduce vulnerability.

A security inspection begins at the front door and goes on to include side and rear doors, windows, locks, lights, and landscaping. Checks in the orange column of this checklist indicate security weaknesses or hazards that require attention.

This survey may be used by law enforcement professionals or others trained in crime prevention. Neither the inspector, the local law enforcement agency, nor NSA have any liability to you other than to use our best judgment in this inspection and these recommendations.

We appreciate the opportunity to be of assistance to you in the community's fight against crime. We urge you not only to take steps to make your own residence safer, but also to become active in a Neighborhood Watch program for the benefit of your entire community.
